DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Snyder et al, US. Pat. No. 6,724,220.
- 3. Claims 1, Snyder teaches a circuit [title, abstract], comprising;
- a bus for communicating data; a microprocessor for processing data, said microprocessor coupled to said bus [Fig. 1, col. 1, lines 21-22];
- a programmable functional component coupled to said bus [Fig. 1], wherein said programmable functional component includes a plurality of functional blocks programmable to provide a plurality of functions and configurations [Fig. 1, col. 5, lines 5-9]; and
- a memory for storing data including information associated with said functions and configurations, said memory coupled to said bus [col. 2, lines 41-45, col. 3, lines 11-14].
- 4. Claim 2, Snyder teaches the programmable functional component includes;
 - a programmable interconnect for coupling components to said bus [programmable interconnect 123 of Fig. 1];

Page 3

Application/Control Number: 09/989,817

Art Unit: 2116

an analog functional block configurable to perform analog functions, said analog block coupled to said interconnect [analog block 121 of Fig. 1]; and

a digital functional block configurable to perform digital functions, said digital block coupled to said interconnect [digital block 122 of Fig. 1].

- 5. Claim 3, Snyder teaches a programmably configurable external communication port for communicatively coupling with external devices [Fig. 1, col. 5, lines 48-59].
- 6. Claims 10-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Hanna, US. Pat. No. 6,542,844.
- 7. Claims 10, 14, 17and 21, Hanna teaches an electronic device dynamic configuration method [title, abstract, col. 6, lines 25-51], comprising:

loading a plurality of configuration images a memory of said electronic device [col. 6, lines 37-41];

configuring said electronic device in accordance with a first configuration image [col. 3, lines 26-28];

performing functions in accordance with said first configuration image [col. 3, lines 26-43];

reconfiguring said electronic device in accordance with a second configuration image [col. 3, lines 26-28]; and

Application/Control Number: 09/989,817 Page 4

Art Unit: 2116

executing functions in accordance with said second configuration image [col. 3, lines 26-43].

- 8. Claim 11 and 19, Hanna teaches reconfiguration of said electronic device in accordance with a second configuration image is performed in response to a predetermined condition or event [col. 3, lines 16-43].
- 9. Claims 12 and 20, Hanna teaches the electronic device is a programmable IC [col. 1, lines 15-20].
- 10. Claims 13 and 15-16, Hanna teaches the first and the second configuration images define different functions and ... [abstract, col. 1, line 60 thru col. 2, line 11].
- 11. Claims 18, Hanna teaches downloading said first configuration image into a memory space of said electronic device; and downloading said second configuration image into another memory space of said electronic device [Fig. 4, col. 3, line 59 thru col. 4, line 8, col. 6, lines 37-41].

Claim Rejections - 35 USC § 103

- 12. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/989,817

Art Unit: 2116

13. Claims 4-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Snyder et al, US. Pat. No. 6,724,220 in view of Hanna, US. Pat. No. 6,542,844.

-

14. Claims 4-9, Snyder fails to teach said memory stores a plurality of configuration images

that define the configuration and functionality of said circuit.

Hanna teaches a system for reconfiguring a programmable device comprising a storage

for storing a plurality configuration images that define the configuration and functionality of the

programmable device [title, abstract, col. 3, line 25 thru col. 4, line 8, col. 6, lines 27-52].

It would have been obvious to one of ordinary skill in the art at the time the invention

was made to modify Snyder to include said memory stores a plurality of configuration images

that define the configuration and functionality of said circuit, because it allows reconfiguration of

programmable devices via download of binary information [see Hanna, col. 1, lines 15-20].

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to A Elamin whose telephone number is (703)305-3804. The

examiner can normally be reached on MON-FRI 9:30 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Lynne Browne can be reached on (703) 308-1159. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 09/989,817

Art Unit: 2116

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
